submissions:

31 August 2021

Message from the Guest Editors

Dear Colleagues,

Urban population worldwide continues to grow and to concentrate. Urban green space provides multiple services and benefits to urban population and contributes to their health and well-being. Thus studying interactions between people living in urban areas and their urban green space has become increasingly important. It is of utmost importance to understand regardless of ownership, the motivations, perceptions, attitudes, values and behaviour of urban residents of different social, demographic and cultural backgrounds and in various geographic contexts with regard to various types of urban green space. However, the challenge of integrating results of such studies into urban and green space planning and management still persists.

The complex challenges mentioned require interdisciplinary and multidisciplinary approaches and we encourage the submission of research, empirical or conceptual studies and reviews from all scientific fields, and research perspectives and approaches.

Message from the Editor-in-Chief

Land is the only open access journal covering all aspects of land science, and it is a pioneering platform for publishing on land system science. Our editorial board is comprised of eminent scholars and we aim to publish high quality research and scholarship. By addressing important global issues across the broad sweep of land science, e.g., urbanization, land grabbing and ecosystem services, *Land* promotes an understanding which will lead to solutions that will benefit human well-being and environmental sustainability.

Author Benefits

Open Access:—free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: Indexed in the Social Sciences Citation Index (SSCI - Web of Science), Scopus (2019 CiteScore: 2.8) and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 12.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2020).
